DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group II in the reply filed on 6/21/05 is acknowledged.

Acknowledgments

2. Acknowledgment is made of the amendment filed 1/9/06.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 18-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tate, Jr. et al. (US 6,653,817 B2).

Tate, Jr. et al. discloses a method of operating a vehicle comprising an engine 22 for driving an AC or DC generator 20, producing voltage, driving a first motor 20 able to be a switched reluctance "SR" motor, see column 3, lines 65-67, driving a first pair of wheels 17, a second motor 20, for driving a second pair of wheels 18, and controlling the system with a digital controller 23, as shown in figure 2. Tate, Jr. et al. does not disclose the vehicle as being a heavy-duty materials handling vehicle. It would have been obvious to one having ordinary skill in the art at the time of the invention to have

Art Unit: 3618

applied the drive system of Tate, Jr. et al. to a materials handling vehicle, which inherently have controls for the material handling apparatus, in order to decrease the amount of gas used, as is well known in the art of hybrid vehicles.

With respect to claim 22, SR motors conventionally have a plurality of poles.

With respect to claim 23, Tate, Jr. et al. does not explicitly recite the motors as able to reverse. The examiner takes official notice that conventional motors are able to reverse and it would have been obvious to one having ordinary skill in the art at the time of the invention to have used reversible SR motors with the vehicle of Tat, Jr. et al. in order to allow the vehicle to go in reverse.

Response to Arguments

5. Applicant's arguments filed 1/9/06 have been fully considered but they are not persuasive. In response to applicant's argument that Tate, Jr. Et al. is nonanalogous art, it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, the applicant's invention appears to be directed at hybrid controls which can be applied to any type of vehicle, including heavy-duty material handling vehicles and therefore any hybrid control system is viewed as analogous.

With respect to the applicant's arguments concerning Tate, Jr. Et al. not disclosing a separate SR motor, claim 18 does not specifically state a "separate" motor and since the generator of Tate is also a motor, it reads on the claim.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

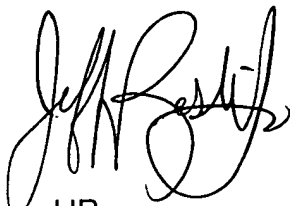

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
